FAHEEM BILAL

Senior Software Engineer | Full-Stack Developer | AI & Cloud Architect

+92 305 7874388 | faheembilal7874@gmail.com | linkedin.com/in/faheem-bilal-dev

PROFESSIONAL SUMMARY

Senior Software Engineer specializing in full-stack, backend and cloud-based application development with the JavaScript/TypeScript ecosystem (**React.js, Next.js, Angular, Node.js, NestJS, Express.js**) across the **MERN and MEAN stacks**. Designs and delivers enterprise-grade, production web applications built on **RESTful and GraphQL APIs, microservices, and MongoDB, PostgreSQL and MySQL** databases, deployed on **AWS (Lambda, EC2, S3, RDS)** with **Docker**.

Hands-on experience with **Python** for backend services, **AI/ML and Generative AI integrations**, third-party API integrations, and **React Native** for cross-platform mobile apps. Strong grounding in system design, database optimization, and performance tuning, with a focus on clean, maintainable code and intuitive user experiences.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Angular, Redux, jQuery, Material UI (MUI), Tailwind CSS, Bootstrap, Sass

Backend: Node.js, Express.js, NestJS, Django, REST APIs, GraphQL, WebSockets, Microservices Architecture, JWT Authentication & Authorization

Databases: MongoDB, PostgreSQL, MySQL, SQL Server; Database Design, Indexing, Query Optimization & Performance Tuning

Cloud & DevOps: AWS (Lambda, EC2, S3, RDS), Docker, CI/CD Pipelines, Cloudinary, Vercel, Render, Hostinger, GoDaddy, Server Deployment & Configuration

Mobile: React Native (Cross-Platform Mobile Applications)

AI / ML: Python-based AI/ML and Generative AI Integration, Data Processing, Model Integration, API-based AI Services

Engineering Practices: Software Architecture, System Design, Debugging, Testing, Performance Optimization, Third-Party API Integrations, MERN & MEAN Stack Development

PROFESSIONAL EXPERIENCE

Codesthinker

Jul 2023 – Present

Full Stack Software Developer

- Architect and develop scalable full-stack web applications with **React.js, Next.js, Node.js (Express) and NestJS**, delivering high-performance, maintainable, production-ready solutions.
- Led end-to-end development of enterprise-grade platforms, including an **Anesthesiology Board Preparation System** and a **Food Delivery Application**, improving user experience, scalability, and performance.
- Design and implement **RESTful APIs and GraphQL services** that enable secure, efficient communication between frontend and backend systems.
- Build and maintain **microservices-based architecture** to improve modularity, scalability, and reliability across distributed services.
- Work extensively with **MongoDB, PostgreSQL and MySQL**, covering schema design, indexing strategies, query optimization, and database performance tuning.
- Deploy and manage cloud infrastructure on **AWS (Lambda, EC2, S3, RDS)** for secure, scalable, highly available production environments.
- Implement **Docker-based containerization** and support **CI/CD pipelines** for automated builds, testing, and deployment.
- Integrate **Python-based AI/ML services and intelligent APIs** to enable data-driven features and add intelligence to applications.
- Deliver responsive, modern user interfaces in collaboration with UI/UX practices using **Tailwind CSS, Material UI (MUI) and Bootstrap**.
- Contribute to backend performance improvements through efficient architecture and scalable design patterns.

CODIEA

Dec 2022 – Jun 2023

Software Developer

- Developed and maintained scalable web applications on the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- Designed and optimized relational and NoSQL databases with **PostgreSQL and MongoDB**, improving data integrity, query efficiency, and system performance.
- Built and integrated **RESTful APIs** and **WebSocket-based real-time features** for dynamic, interactive user experiences.

- Developed responsive, SEO-optimized front-end interfaces with **React.js and Next.js**, improving performance and user engagement.
- Worked closely with UI/UX teams to turn design requirements into clean, reusable, scalable front-end components.
- Participated across the full software development lifecycle: requirements analysis, development, testing, deployment, and maintenance.
- Improved application scalability, code quality, and maintainability through modular architecture and reusable components.

SELECTED PROJECTS

Linkway Rides – Transport Booking Platform | UK coach, minibus and airport transfer services

- Built a responsive, scalable booking platform where users browse vehicles and destinations, book rides online, and access 24/7 customer support.
- Implemented secure login, registration and user management, plus a dynamic booking system with database integration for users, vehicles and reviews.
- Created RESTful APIs to handle real-time data, and integrated customer support and newsletter subscription features.

Al Tamakon Comprehensive School Website | Full-stack, bilingual (English/Arabic), Qatar

- Designed and implemented the complete frontend and backend architecture for a private school's website, improving digital presence, parent engagement, and institutional communication.
- Developed dynamic pages (Services, Programs, Parent Survey, Testimonials, Contact, Login) with database management, secure authentication, and validated contact and inquiry forms.
- Implemented bilingual RTL/LTR layouts; optimized performance, SEO, mobile responsiveness, accessibility, and cross-browser compatibility.
- Deployed and maintained the live production environment.

BMX Adventure – E-Commerce Platform | React.js, Tailwind CSS, Node.js, Express, MongoDB

- Developed an e-commerce site with an admin CRM dashboard, **JWT authentication**, SEO, and responsive design.
- Integrated **AWS (EC2)** for hosting and **Cloudinary** for media management.

Empower Zone Consulting Website | Bilingual website, New York-based benefits consulting firm

- Designed and developed a bilingual, responsive website for a firm that helps families with SNAP, Medicaid, WIC and related benefits (the firm reports 500+ families assisted and $2M+ in aid secured).
- Added clear calls-to-action, success stories, service explanations, and contact integrations (WhatsApp, email, phone) to build trust and drive consultation inquiries.
- Structured content around the firm's differentiators: personal support, denial-appeal handling, and a reported 98% success rate.

Online Quran Learning Academy Website

- Developed an online learning platform offering one-on-one sessions with certified tutors, flexible scheduling, and courses from Noorani Qaida to advanced Tajweed, Hifz and Tafseer.
- Designed a user-friendly Arabic/English interface with free trial classes, personalized lesson plans, and progress tracking to improve student experience and retention.
- Integrated live teaching, student testimonials, FAQs, and support services.

Akoya Premium Garment Care Website

- Designed and developed a luxury garment care platform presenting premium services, eco-friendly cleaning, couture preservation, and VIP membership features.
- Created a bilingual (Arabic–English) interface with service booking flow, fragrance selection, and packaging add-ons.
- Applied responsive design, modern UX, and consistent branding to strengthen client identity and customer engagement.

Novietaa Plus | React.js, Tailwind CSS, Redux

- Built a multilingual web app supporting **English and Arabic (RTL)**, with Redux for state management and a responsive UI.

Nasa Tech | React

- Created a responsive corporate website with third-party integrations, using code splitting and optimized state handling for performance.

The Givers Consulting

- Built a website for a consultancy and IT services company, presenting global services including mining and overseas employment.

PORTFOLIO: APP DESIGNS & LIVE PROJECTS

Mobile App Designs (Figma)

Fast Ride App | Ride-booking mobile app — View Figma Design

How it works: Follows the standard ride-booking journey: the rider sets pickup and drop-off points, selects a ride option, confirms the booking, and tracks the trip.

Tech: Figma (UI/UX design)

STMCZ App | Mobile app — View Figma Design

How it works: Defines the app's screen layouts, navigation structure, and user flows in a single design file for developer handoff.

Tech: Figma (UI/UX design)

Yes Time App | Mobile app — View Figma Design

How it works: Maps the app's interface structure and user flows from onboarding to core screens in a single design file.

Tech: Figma (UI/UX design)

Health & Fitness App | Mobile app — View Figma Design

How it works: Organized around fitness-tracking flows: user profile, workouts, activity tracking, and progress views.

Tech: Figma (UI/UX design)

Multi-Services, Learning & Entertainment App | Multi-module mobile app — View Figma Design

How it works: A single app with service, learning, and entertainment modules reached through one unified navigation structure.

Tech: Figma (UI/UX design)

Live Apps & Websites

PureFitness Africa 3.0 | Android app, Health & Fitness — View on Google Play

How it works: Members use the app to access Pure Fitness Africa's fitness services and support. The Play listing states that data is encrypted in transit and that users can request data deletion.

Tech: Android app published on Google Play (1K+ downloads)

Olive & Cedar Restaurant Website | MenuHoster demo — View Live Site

How it works: Visitors browse the menu (18 dishes in 4 sections), gallery, reviews, and location pages, then order online or reserve a table from the site. Orders and reservations are simulated in the demo.

Tech: Responsive web (HTML5, CSS3, JavaScript) on the MenuHoster platform

Turbo Car Wash Website | Template-based website — View Live Demo

How it works: A responsive, multi-section site presents car wash services in a Bootstrap grid layout, adapted from the TemplatesJungle "Turbo" template.

Tech: HTML5, CSS3, Bootstrap 5

Tools & References

E-commerce references (third-party sites used for UX and feature benchmarking of product listings, product pages, cart and checkout): Allbirds, Dermalogica. Tooling: RapidNative (AI-assisted React Native/Expo app prototyping).

EDUCATION

Bachelor of Science in Computer Science — 2017 – 2021

The Islamia University of Bahawalpur
